DETAILED ACTION

Drawings

Figures 10 and 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

See Line 1, "It is aimed..." and line 6, "or the like". Appropriate correction is required.

The disclosure is objected to because of the following informalities: Page 1, lines 5, 7 and 12 contain the phrase "or the like" which provides no definite reference to a specific article, Deletion is recommended. Page 14, line 9 contains the phrase "relieved is hitting...". Page 4, lines 11 and 12 contain the phrase "device of claim 1...". Since the claim may change during prosecution of the application, reference to the claim content in the specification is improper. The examiner fails to understand the meaning of the statement.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a bone conduction speaker device in a foam padded enclosure. Independent claim 1 identifies the uniquely distinct feature of a receiver with a plurality of spaced apart photo-acceptors mounted on the fringe of an elastic cushioning body for receiving and demodulating an infrared signal into a sound signal and supplying the sound signal to a bone conduction speaker mounted in the elastic cushioning body shaped as a pad in combination with all the disclosed limitations of claim 1. The prior art fails to anticipate or render the independent claims obvious..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2615

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

This application is in condition for allowance except for the following formal matters:

See detailed description above..
